The 12th Malaysia Plan (12MP) is a development roadmap for 2021 to 2025 and it focuses on the strategic priorities that will transform Malaysia. It is within this context that the Plan strives to bring about sustainable economic recovery as well as provide better social protection to vulnerable segments of society. There are several key themes under the 12MP and following are some main points related to water and environment sectors that are crucial to the water industry:

- Government allocates RM400b for projects under 12MP and we will find out how much is available for the water sector
- Greenhouse gas emissions to be reduced to 45% of GDP by 2030 in line with Paris Agreement.
- Government vows to reduce bureaucracy and build reliable infrastructure and ecosystem to attract quality foreign investments
- Special facilitation fund for infrastructure projects will be given under Public-Private Partnership 3.0 model, undertaken via requests for proposal (RFPs), with projects expected to be announced in mid-2022
- Malaysia to become carbon-neutral as early as 2050; carbon pricing and carbon tax to be introduced.

- Water Sector Transformation Agenda to be introduced under 12MP to increase management efficiency, optimise potential for wealth generation, create job opportunities

We are honoured to have YBhg. Dato' Seri Ir. Dr. Zaini Ujang, the Secretary General of KASA as the Guest Speaker accompanied by three panelists – the President of MWA, CEO of Pengurusan Air Selangor and President of Water Watch Penang, led by Moderator from Water Think Tank, who will discuss in depth on the topic related to water supply and wastewater, emphasizing on the followings:
